

# **Enhanced Support Facility Update Information**

### **Preface**

#### **Purpose**

This manual provides an overview and details of the upgraded functions of the Enhanced Support Facility (ESF). These functions are provided for the SPARC Enterprise and PRIMEPOWER series server.

Read this manual to determine whether to upgrade the ESF version.

#### Intended Readers

This manual is intended for the following readers:

- System designers authorized to decide whether to install this software
- System administrators who introduce and operate this software

#### **Organization**

This manual is organized as follows:

#### Chapter 1: New Features

Describes the features that have been added to the latest version.

#### Chapter 2: Modification

Describes changes that have been made to the latest version.

#### Notation

The following names, abbreviated expressions, and symbols are used in this manual:

#### Manual names

- This manual itself is referred to as "this manual."
- Any manual for this product is sometimes referred to by omitting "Enhanced Support Facility" at beginning of the formal name and supported server models at the end of the formal name. "User's Guide for Machine Administration," or "User's Guide for REMCS" is one of such examples.

Example: Enhanced Support Facility User's Guide for SCF Driver (PRIMEPOWER)

→ User's Guide for SCF Driver

#### Abbreviation

In this document, the formal names of the products below are abbreviated as follows:

Formal name	Abbreviation
SPARC Enterprise M3000/M4000/M5000/M8000/M9000	SPARC Enterprise M series
SPARC Enterprise	SPARC Enterprise T series
T1000/T2000/T5120/T5140/T5220/T5240/T5440	

#### Marks

In this manual, the marks below are used for cautionary messages and reference information.

Mark	Description		
Note	Contains a warning or cautionary message. Make sure you read it carefully.		
Point	Contains reference information that you will find useful.		
<b>≪⊚</b> See	Provides reference information. Refer to the information when necessary.		

#### TRADEMARK ACKNOWLEDGEMENTS

- Linux is a registered trademark or a trademark in United States or other countries of Linus Torvalds.
- Microsoft, Windows, Windows NT, and Windows Server are registered trademarks of Microsoft Corporation in the United States and other countries.
- Sun, Solaris, HotJava, and SunVTS are trademarks or registered trademarks of Sun Microsystems, Inc. in the U.S. and other countries.
- Java and Java-related related trademarks and logos are trademarks or registered trademarks of Sun Microsystems, Inc., in the United States and other countries.
- Netscape and the logos of "N" for Netscape and the 'ship's steering wheel' are
  registered trademarks in the United States and other countries, owned by Netscape
  Communication Corporation.
- Red Hat, RPM, and all Red Hat-based trademarks and logos are trademarks or registered trademarks of Red Hat, Inc. in the United States and other countries.
- Solaris and all Solaris based marks and logos are trademarks or registered trademarks of Sun Microsystems, Inc. in the U.S. and other countries, and are used under license.
- UNIX is a registered trademark of Open Group in the United States and other countries.
- All other product names mentioned herein are the trademarks or registered trademarks of their respective owners.
- Microsoft product screen shot(s) reprinted with permission from Microsoft Corporation.
- Systems and product names in this manual are not always noted with trademark or registered trademark symbols ( $^{\text{TM}}$ ), ( $^{\text{CM}}$ ).
- All SPARC trademarks are used under license from SPARC International, Inc. and are trademarks or registered trademarks of that company in the U.S. and other countries.
- SPARC64 is a trademark of SPARC International, Inc. in the U.S. and other countries and used under license.

## **Revision History**

Revision	Date	Details	
8	August 01, 2006	Addition of description for Enhanced Support Facility 3.0.	
9	April 09, 2007	Patches of Manuals & Patches 3.0A10 are added to Table 2.3.	
10	June 25, 2007	Patches of Manuals & Patches 3.0A20 are added to Table 2.3.	
11	January 10,	Chapter 1 New Features Manuals & Patches 3.0A10, Manuals & Patches 3.0A20,	
	2008	Manuals & Patches 3.0A30 are added.	
		Patches of Manuals & Patches 3.0A30 are added to Table 2.3.	
12	April 16, 2008	The description about SPARC Enterprise T5140/T5240 supported by Enhanced	
		Support Facility 3.0.1 has been added.	
13	September 02,	The description of Enhanced Support Facility 3.1 has been added.	
	2008	The description about SPARC Enterprise M3000/T5440 supported by Enhanced	
		Support Facility 3.1 has been added.	
14	February 18,	Patches of Manuals & Patches 3.1A10 are added to Table 2.3.	
	2010

Chapter 1	New Features · · · · · · · · · · · · · · · 1
Chapter 2	Modification · · · · · 18

## Chapter 1 New Features

The following table 1.1 defines new features added to previous versions of this software.

\* System Control Facility driver is abbreviated to SCF driver and System Control Facility hardware is abbreviated to SCF in this document.

Table 1.1

Vers Lev		Component	New Feature Name	Description
3. 1	A10	Machine Administrat ion	The External I/O Expansion Unit is supported.	In SPARC Enterprise series T5120/T5220/T5140/T5240/T5440, the Machine Administration has supported the External I/O Expansion Unit (SENY8BE1F).
			Machine Administration support added for the Expansion File Unit connected to the standard (on board) SAS port.	In SPARC Enterprise M3000, Machine Administration has supported the Expansion File Unit(SE0X9FL1F, SE0X9FL1N, SE0X9FL1X, SE0X9FL1A) connected to the standard(on board) SAS port.
			Support of error monitoring of the 8Gbps fiber channel card	In SPARC Enterprise series, the Machine Administration has supported the error monitoring function of the 8Gbps fibre channel card(SEOX7F21F/SEOX7F22F).
			Error monitoring of a disk unit	The error monitoring function of the disk unit of Machine Administration has been improved.
		Remote Support	Support of the maintenance menus with the root privilege	In SPARC Enterprise T1000/T2000/T5120 /T5220/T5140/T5240/T5440, the maintenance start menu and maintenance end menu have been supported with the root privilege.
		Tape Driver Configurati on Tool	Added new target tape devices	The following tape units have been newly supported:  • LTO Ultirum4 half height Tape Drives(SAS)  • LTO Ultrium4 Full height Tape Drives(SAS)

Version Level	Component	New Feature Name	Description
3. 1	All components	SPARC Enterprise M3000/T5440 support Accompanying DVD-ROM	The SPARC Enterprise M3000/T5440 is supported (Solaris 10 OS).  Accompanying media has been changed from
	Machine Administrat ion	Support of Hot Swapping Guide menu	CD-ROM to DVD-ROM.  In SPARC Enterprise T1000/T2000/T5120/T5220/T5140/T5240, Machine Administration "Hot Swapping Guide" menu has been supported and the Expansion File Unit(SE0X9FL1F, SE0X9FL1N, SE0X9FL1X, SE0X9FL1A) has been supported.
		Improvement of the monitoring Function of internal FAN/PSU	In SPARC Enterprise T1000/T2000/T5120/T5220, the Machine Administration improves the monitoring function of FAN/PSU.
		Support will be terminated.	Support for the GUI menu of the Machine Administration has been terminated.
	System Data Output Tool	Improvement of collection function	Driver and LDoms are added as collection information.  Even when the path of extraction information is long, it processes normally.
	Tape Driver Configurati on Tool	Added new target tape devices	The following tape units are newly supported:  • LTO Ultrium3 half height Tape Drives  • LTO Ultrium4 Tape Drives  • ETERNUS LT230 and LT250 Tape Libraries
	Patch Information Collect Command	Addition of command options -Z, -s	The function (-Z) saving patch information in zip format has been added. The function (-s) reducing CPU usage during execution of the fjcollect command has been added.
	Web-BasedAd min View /WWW Server for Admin View	Support will be terminated.	Support for the following component has been terminated. Web-Based Admin View/WWW Server for Admin View

	sion vel	Component	New Feature Name	Description
3.	0. 1	All components	SPARC Enterprise T5140/T5240 support Inclusion of patch information on Enhanced Support Facility Manuals & Patches	The SPARC Enterprise T5140/T5240 is supported(Solaris 10 0S).  Patch information from Enhanced Support Facility Manuals & Patches 3.0A10 through Enhanced Support Facility Manuals & Patches 3.0A30 has been included.
3.0	*A30	All components  DR command	Support for LDoms on SPARC Enterprise T5120/T5220  Dynamic Reconfiguration provided by the Enhanced Support Facility is supported on SPARC Enterprise M4000/M5000/M8000/M9000 servers equipped with SPARC64 VII processor.	Support for LDoms on SPARC Enterprise T5120/T5220  Dynamic Reconfiguration provided by the Enhanced Support Facility is supported on SPARC Enterprise M4000/M5000/M8000/M9000 servers equipped with SPARC64 VII processor.
	*A20	All components  DR command  Remote Support Automatic power supply control	SPARC Enterprise T5120/T5220 support The SPARC Enterprise M4000/M5000/M8000/M9000 series are supported PRIMEPOWER-DR function	The SPARC Enterprise T5120/T5220 is supported(Solaris 10 0S).  The following functions for the SPARC Enterprise M4000/M5000/M8000/M9000 series are supported after Enhanced Support Facility 3.0, Enhanced Support Facility Manuals & Patches 3.0 A20, and the firmware (XCP) of the unit are updated to Version 1050 or later:  - PRIMEPOWER-DR function - Transmission of software investigation information to the REMCS center - Automatic power supply control
	*A10	All components	Necessary patches for SPARC Enterprise T1000/T2000/ M4000/M5000 /M8000/M9000 have been put together.	Necessary patches for SPARC Enterprise T1000/T2000/M4000/M5000/M8000/M9000 have been put together.
3.0		All components	SPARC Enterprise T1000/T2000/M4000/M5000/M 8000/M9000 support Flash archive support  Change of the manual system  Change of the online manual file format Discontinuation of old model support	The SPARC Enterprise T1000/T2000/M4000 /M5000/M8000/M9000 is supported (Solaris 10 OS). Flash archive including Enhanced Support Facility is supported. The ESF User's Guide has been changed to a document that has explanations for the ESF as a whole. Explanations for individual components have been arranged in separate volumes.For details on the new manual system, see the ESF User's Guide. The format of online manual files was changed from HTML to PDF. Support for the following machine types has been discontinued: PRIMEPOWER 1/200/400/600/800/1000/2000, GP7000F model 200/200R/400/400R/400A/ 600/600R/1000/2000 Use ESF 2.6 for old models.

Version Level	Component	New Feature Name	Description
		Installation of the bundled driver	In case of SPARC Enterprise T1000/T2000/M4000 /M5000/M8000/M9000, the following drivers are installed FUJITSU PCI GigabitEthernet - FUJITSU ULTRA LVD SCSI Host Bus Adapter Driver
	Enhanced Support Facility	Automatic model recognition at custom jump start	Automatic model recognition to be performed also at custom jump start was newly implemented.
	Information management	Mount checking function at installation	The function for checking at installation whether a file system is mounted under /opt was newly added.
	SCF/SCSI Fault LED support option	SCF/SCSI Fault LED support option support	The SCF/SCSI Fault LED support option is optional software that supports the command for accessing the RCI interface included in high-end and mid-range SPARC Enterprise Server models and the DISK hot swapping of SCSI DISK provided by Machine Administration.
	Remote Support	Improvement of the software information collection function	Improvement of the information collection function when a software problem occurs
	System Data Output Tool	Addition of information to be collected	The following was added to the information to be collected: ETERNUS multipath driver/machine Administration/SNMP/OS environment/ZFS
	Tape Driver Configuration Tool	Added new target tape devices	The following tape units are newly supported:  DAT72 Tape Drives  ETERNUS LT Series Tape Libraries
	License Manager	Deletion of License Manager	License Manager is included in each middleware product.

\*A30: Enhanced Support Facility Manuals & Patches 3.0A30
\*A20: Enhanced Support Facility Manuals & Patches 3.0A20
\*A10: Enhanced Support Facility Manuals & Patches 3.0A10

Version Level	Component	New Feature Name	Description
2.6	Web-BasedAdmin	Addition of new client	The clients of Web-Based Admin View newly
	View /WWW	environment	support following type of Web
	Server for		browser: (Mozilla Web browser bundled in
	Admin View		Solaris10 OS [Workstation])
	Machine	Enhancement of monitoring	The FMA message in Solaris10 monitoring
	Administration	function	function is supported on GP7000S, Fujitsu S series.
			Improved monitoring function informs of
			hardware errors detected by POST on
			PRIMEPOWER650/850.
		Enhancement of log	Support for function to collect SCF error log
		Collection command	files by savelogs command on
			PRIMEPOWER650/850.
		Enhancement of Machine	Support for function that displays dialog
		Administration GUI menu	which suppresses the use of the CUI menu when
			WebSysAdmin is not installed.
	Remote Support	authentication function is	Support for SMTP authentication function on
		supported	PRIMEPOWER250/450/650/850.
		Device identification file	Support for Machine identification file
		destruction tolerance	checksum to improve resilience to file
		improvement	corruption.
		REMCS file compression	REMCS file compression process is improved
		process is improved	
		Improvement of method of	The generation of unique names of temporary
		making temporary file	file is improved
		Communication log size	The default maximum communication log file
		improvement	size is changed to 100KB, regardless of
			preservation period.
		For GMT offset summer time	The GMT offset in REMCS file supports daylight
			saving time.
	Patch	The addition of the	A command is added to collect "Patch
	Information	information extraction	Information"(such as installed packages,
	collect command	function of the patch	applied patches, and hardware model
		versions	information) for patch analysis using the
			Patch Management Tool

Version Level	Component	New Feature Name	Description
2. 5. 1	Machine Administration	Solaris 10 supported at PRIMEPOWER1/100 Adds the information by the	Support for monitoring function of PCI error messages.  Addition of HCP information in fjsnap.
		fjsnap command. Support the Custom JumpStart	Support for Custom JumpStart installation
		installation.	with Solaris 10.
		Improvement in the tape	Support for function to add tape drives not
		monitoring function.	needing monitoring to the no-monitoring list automatically.
		Improvement of the XSCF user	New option to specify a password by argument
		password administration command.	with command that sets an XSCF users password on PRIMEPOWER250/450.
		New CPU support	2. 025GHz SPARC64-V CPUs supported on PRIMEPOWER650/850.
		Support the DR command.	Support for DR command with Solaris 10.
2.5	All components	Solaris 10 OS support	Support for Solaris 10 0S on PRIMEPOWER1/100/200/250/400/450/600/650/800 /850/900/1000/1500/2000/2500/HPC2500, GP7000F model 200/200R/400/400R/400A/600/600R/800/1000//2000.
	Web-Based Admin View / WWW Server for Admin View	Addition of new client environment	Web-Based Admin View clients nowy support the following OS, Web browser, and Java Plug-in:  PC client: Windows(R) XP  Web browser: Netscape 7.X  Java Plug-in: Java(TM) 2 Runtime Environment Standard Edition v1.4.2
			Note: Web browser conditions(including Java Plug-in) and clients vary depending on the operations management products use. For details, refer to the documentation with the management product.
	Machine Administration	Support the hot-exchange menu of the RCI I/O device.	Support for hot-exchange menu with RCI I/O devices.
	Valititi2ft gf10[[	Enhancement to disk drive	Support for function that automatically
		hot-exchange function.	exclude disk volumes when a disk abnormality occurs.  This function is implemented is cooperation with PRIMECLUSTER/GDS 4.1A30 or later.
		The monitoring function of the DAT72 is supported.	DAT72(PW023DT5/PW023DT6) devices are added to the target of the tape cleaning monitoring function.

Version Level	Component	New Feature Name	Description
2.5	Remote Support	REMCS8.2 version function support	On PRIMEPOWER250/450/650/850, the REMCS menu is changed so that registration execution is easier.
			On PRIMEPOWER250/450/650/850, the retry method for periodic connection information errors is changed.
			On PRIMEPOWER1/100/200/250/400/450/600/650 /850 and GP7000F model 200/200R/400/400R/400A/600/600R, collected software investigation information can be sent to the REMCS Center even if the system is in maintenance mode.
	System Data Output Tool	NTP support	Addition of system information related to NTP to the collected data.
		PRIMECLUSTER Wizard for NetWorker support	Addition of system information related to PRIMECLUSTER Wizard for NetWorker to the collected data.
		Systemwalker Resource Coordinator support	Addition of system information related to Systemwalker Resource Coordinator to the collected data.
		Patch Management Tool support fjsnaplt support	Addition of system information related to Patch Management Tool to the collected data.  Addition of fjsnaplt command.
		Machine administration support	Addition of system information related to Machine administration to the collected data.
		Solaris 10 OS support	Addition of system information related to Solaris 10 to the collected data.  System VIPC, Service Management Service, Fault Management.
	Tape Driver Configuration Tool	Tape Driver Configuration Tool support	Support for the configuration function with tape driver configuration file.  On PRIMEPOWER1/100/200/250/400/ 450/600/650/800/850/900/1000/1500/2000/2500/HPC2500
2. 4. 1	All components	Solaris Custom Jump Start support	Support for Solaris Custom Jump Start on PRIMEPOWER250/450/600/650/850 /900/1500/ 2500/HPC2500 (with Solaris 9 0S).
		Solaris Live Upgrade support SPARC64(TM) V1.82GHz Support	Support for Solaris Live Upgrade. Support for SPARC64(TM) V 1.82GHz.
	SCF driver	SCF driver message is added	SCF driver messages for power failure and recovery added to DC models of PRIMEPOWER250/450/650/850/900/1500.
		fjprtdiag command enhance	Display of PCI card name property added to fjprtdiag command.
		diskadm command enhance	Modified diskadm command error message when diskadm command is executed for DISK not supported.

Version Level	Component	New Feature Name	Description
2. 4. 1	SunVTS, FJVTS	Version upgrade	The versions of SunVTS and FJVTS for Solaris 9 0S are upgraded to 5.1.
	Machine Administration	Solaris Live Upgrade support	"savelogs" command supports Solaris Live Upgrade.
	Remote Support	REMCS7.0 version function support	Software message monitoring function added.
	Auto Dump Analyze Tool	Solaris 9 OS support	"cocore" command support for Solaris 9 OS.
	G-LAN error notification	GigabitEthernet interface error Notification	Addition of GigabitEthernet interface error notification on RIMEPOWER200/250/400/450/600/650/800/850/900/1000/1500/2000/2500/HPC2500(Solaris 8 0S and Solaris 9 0S)
	System Parameter Diagnosis	System Parameter Diagnosis support	Support for diagnosis function of system parameters on PRIMEPOWER1/100/200/250/400/450/600/650/800/850/900/1000/1500/2000/2500/HPC2500(Solaris 8 OS and Solaris 9 OS)
2.3	All components	PRIMEPOWER 250/450/650/850/900/1500 Support	Support for PRIMEPOWER250/450/650/850/900/ 1500(Solaris 8 OS and Solaris 9 OS)
		PRIMEPOWER 2500/HPC2500 Support	Support for PRIMEPOWER 2500/HPC2500(On Solaris 8 OS)
		External file unit (PW007FL2/PW007FL2U)	Support for external file unit (PW007FL2/PW007FL2U)
		Optional installation	Support for Optional installation on Solaris 8 OS and Solaris 9 OS.
		PCI Hot Plug support	Support for PCI Hot Plug on Solaris 8 OS.
		Document	PCI Hot Plug users guide added to online manual.
			PCI Hot Plug users guide I/O device Chapter added to online manual.
			Security System Building Guide added.
		Patch automatic application	Patch now automatically applied with the installer.
	DR command	PRIMEPOWER 900/1500/2500	Support for Dynamic Reconfiguration on
		Document	PRIMEPOWER 900/1500/2500 with Solaris 8 OS.  Dynamic Reconfiguration users guide I/O device Chapter added to online manual.
	SunVTS, FJVTS	Network test enhance	PW008FE1 card can be diagnosed with nettest.
	Machine Administration	Enhancement of monitoring function	Power supply unit monitoring function enhanced on PRIMEPOWER1/100/200/400/600, GP7000F Model200/200R/400/400R/400A/600/600R.
			Fan monitoring function enhanced on PRIMEPOWER1/100/200/400/600, GP7000F Mode1200/200R/400/400R/400A/600/600R.
			Abnormal temperature monitoring function now supported on PRIMEPOWER1/100/200/400/600, GP7000F Model200/200R/400/400R/400A/600/600R.

Version Level	Component	New Feature Name	Description
2.3	Remote Support	Enhancement of remote	Function for software configuration
		maintenance	information collection enhanced.
		REMCS5.5 version function	SMTP only supported.
		support	User authentication of SMTP server (PoP before
			SMTP) supported on report to REMCS Center.
			Detailed error code display added to the error message.
	System Data Output Tool	BLASTBAND HPC Support	Addition of system information related to BLASTBAND HPC to the collected data.
		SRFS over BLASTBAND HPC	Addition of system information related to SRFS
		support	over BLASTBAND HPC to the collected data.
		DiskSuite 4.2.1 Support	Addition of system information related to DiskSuite 4.2.1 to the collected data.
		Java Edition RC2000 support	Addition of system information related to Java
			Edition RC2000 to the collected data.
		Fujitsu middleware support	Addition of modification information of
			Fujitsu middleware to the collected data.
			Addition of system information related to WebSysAdmin to the collected data.
	Reliability	Support general use	Serial ports on system board and PCI/Disk BOX
	Driver		made available for general use on
			PRIMEPOWER900/1500/2500/HPC2500.
	НСР	HCP management support	Addition of XSCF User's Guide, firmware and utility. (PRIMEPOWER 250/450 only)
2.2	All components	PRIMEPOWER1500 (Model	Support for Solaris(TM) 8(Operating
	•	equipped with SPARC64TM GP)	Environment) on PRIMEPOWER1500(Model
		support	equipped with SPARC64TM GP)
		Solaris 9 OS support	Support for Solaris 9 OS on
			PRIMEPOWER1/200/400/600/1000/2000, GP7000F
			Models 200/200R/400/400R/400A/600/600R/800/ 1000/2000
	*SCF Driver	Change in command provision	Prtdiag(1M) command provided with ESF2.1 and
			earlier versions is replaced by Fjprtdiag(1M)
			command at ESF2.2 and later versions.
	SunVTS, FJVTS	Version upgrade	The versions of SunVTS and FJVTS for Solaris
			9 OS are upgraded to 4.5.
	Machine	Enhancement of hot swapping	The hot swapping guide menu of "Power Supply
	Administration	guide	Unit of Main Cabinet" is enhanced on
	Namini Societion   Salar		PW200/400/600 and GP7000F Models
			200R/400/400R/400A/600/600R.
	Remote Support	Enhancement of remote	REMCS agent menu function is enhanced.
		maintenance	Tape unit information added to HW
			configuration data sent to the REMCS center.

Version Level	Component	New Feature Name	Description
2.2	Web-Based Admin	Java 1.3.1 environment	The Java 2 Runtime Environment Version 1.3.1
	View / WWW	support	environment is supported when GUI is used.
	Server for	Additional manual pages	Addition of manual pages for the following
	Admin View		commands:
			fjsvwvbs(1m)
			fjsvwvcnf(1m)
			wvCntl(1m)
			wvGetparam(1m)
			wvSetparam(1m)
			wvstat(1m)
	Server Default	CPU offline supports	Processor resources used by Parallelnavi are
	Configuration	Parallelnavi cooperation	automatically cleaned up before the processor
			is off-lined due to frequent ECC errors.
		Support of new processor	Single bit error watch function was is
			supported for new processor.
	System Data	Parallelnavi support	Addition of system information related to
	Output Tool		Parallelnavi to the collected data.
		crash dump analysis file	Addition of system information related to
		support	"crash dump analysis file" to the collected
			data.
		Enhanced Support Facility	Addition of system information related to ESF
		Information Management	Information Management to the collected data.
		support	
		Web-Based Admin View support	Addition of system information related to Web-Based Admin View to the collected data.
		CHITCH DOL COOL Ad-nt-n	
		FUJITSU PCI SCSI Adapter Driver 1.0/2.0 support	Addition of system information related to FUJITSU PCI SCSI Adapter Driver to the
		Driver 1.0/2.0 support	collected data.
		Hard Disk Driver Control	Addition of system information related to Hard
		Software support	Disk Driver Control Software to the collected
		Support	data.
		FUJITSU Fibre Channel Driver	Addition of the system information related to
		support	FUJITSU Fibre Channel Driver to the collected
			data.
		Multipath Disk Control load	Addition of system information related to
		balance option (MPLB)	Multipath Disk Control load balance option to
		4-paths/8-paths 2.x support	the collected data.
		BSNPS support	Addition of system information related to
			BSNPS to the collected data.
		MultiPath Disk Control	Addition of system information related to
		support	MultiPath Disk Control to the collected data.
	Auto Dump	Auto Dump Analyze Tool	Automatic analysis of crash dump file on
	Analyze Tool		system reboot, using Auto Dump Analyze Tool.
2. 1	SunVTS, FJVTS	PGX64 adapter support	PGX64 adapter can be diagnosed with m64test.
		PW008GE2, PW008GE3 support	PW008GE2 and PW008GE3 adapters can be
			diagnosed with nettest.
	Machine	Addition of the reported	Addition of kernel driver message that reports
	Administration	message	when an error occurs.

Version Level	Component	New Feature Name	Description
2.1	Remote Support	Enhancement of remote maintenance	The function for Software Investigation Information Collection was enhanced. Remote maintenance system setting menu and a function that reports to REMCS Center are enhanced. Addition of Point-to-Point Connection function.
	System Data Output Tool	SynfinityLink support  Emulex Adapter support	Addition of system information related to SynfinityLink to the collected data.  Addition of system information related to
2.0	All components	PRIMEPOWER650/850 support	"Emulex Adapter" to the collected data.  Support for Solaris 8 OS on PRIMEPOWER650/850
	Enhanced Support	Improvement of the esfadd command	Display method of package list, updated and improved.
	Facility Information Management	Improvement of the esfrm command	Later versions of packages previously installed using the Enhanced Support Facility removed from the deletion target.
		New addition of the esfver command.	Addition of esfver command, to confirm the name and the latest version information for Enhanced Support Facility installed packages.
		Improvement of the esfadd and esfrm command	Enhanced installation/uninstallation log collection to make troubleshooting of installation/uninstallation problems easier.
	*SCF Driver	PRIMEPOWER650/850 support	Addition of SCF 3 driver as a RAS control device driver for PRIMEPOWER650/850.
		CoD function support	CoD function support for PRIMEPOWER800/1000/2000 and GP7000F Models 1000/2000.
	SunVTS, FJVTS	Reinforcement of the CPU tests	Ability to test CPUs improved on FJVTS.
	Web-Based Admin View / WWW	Function of secondary server	Addition of dynamic movement function for secondary servers.
	Server for Admin View	Definition information is maintained in each node	Definition information for each node is now maintained on each respective node.
		Menu button is permanently displayed.	The menu on Web-Based Admin View made permanently accessible.
		Java2 support.	GUI can now use Java2.  Java-PlugIn is necessary for displaying GUI.
		Information definition separation function.	Information on each GUI separated.  Dependence can be maintained even if FJSVwvbs is user deleted with pkgrm.
		Correction of HTTP's header	The operation of the HTTP's header was corrected.
		Correction of overwrite installation	Addition of a function that stops the deamon when overwrite installation is started.
		Correction of log information	Extra information and additional function acquired for full thread dump of JavaVM.

Version Level	Component	New Feature Name	Description
2.0	Machine	Java2 support.	GUI can use Java2.
	Administration		Java-PlugIn is necessary for displaying GUI.
		Support of function to call	Function to call WSA from GUI is now supported.
		WSA	
		Enhancement of disk	The longevity monitoring system of the disk
		longevity monitoring system	was enhanced. Access to the disk without the
			longevity monitoring system was stopped.
		Improvement of the	Component description added to notification
		notification message	messages when errors in CPU, memory, or disk
			occur with PRIMEPOWER1/100/200/400/600 and
	D		GP7000F Models 200/200R/400R/400A/600/600R
	Remote Support	Enhancement of remote	The function for Software Investigation
		maintenance	Information Collection was enhanced.
			CPU and memory information on HW configuration data is enhanced with
			PRIMEPOWER1/100/200/400/600 and GP7000F
			Models 200/200R/400R/400A/600/600R.
	Server Default	Prohibit system suspending	Prohibition of suspend system execution by a
	Configuration		normal user. (PRIMEPOWER and GP7000F only)
		Dump Function	Support for Dump Function of PRIMEPOWER
			650/850. Can save memory dump by REQUEST
			switch on the operator panel.
	System Data	Synfinity-VIA support	Addition of System information related to
	Output Tool		Synfinity-VIA to the collected data.
		SynfinityCluster/HA for	Addition of system information related to
		Oracle support	SynfinityCluster/HA for Oracle to the
			collected data.
		AP-Net Basic Software	Addition of system information related to
		support	Ap-Net Basic Software to the collected data.
		Files exceeding 100 Mbytes support	Collects files exceeding 100 Mbytes.
	Reliability	Automatic diagnosis of a	Additional function for diagnosing standby
			console path automatically on the redundant
			console path system.
	CPU Performance	CPU Performance Counter will	CPU Performance Counter is no longer covered
	Counter	be provided as a Solaris OS	by esfrm/esfadd. On Solaris 8 7/01 OS or
		standard feature on Solaris	earlier versions, an extra command is required
	8 10/01 0S or later versions.		to install or uninstall FJSVcpc.
1.8	DR Command	Dynamic Reconfiguration	Addition of new check for the Dynamic
		configuration checking	Reconfiguration configuration.
		mechanism	
		Additional message	Addition of function showing the execution
			states of the connection script.
	SunVTS, FJVTS	Enhancement of the CPU tests	fjcachetest and fjcputest of FJVTS enhanced.

Version Level	Component	New Feature Name	Description	
1.8	Machine Administration	Improvement of the menu operation performance	The menu display is improved.	
		Excluding function for a specific device	Addition of function to exclude a specific device from devices monitored by the regular automatic monitoring.	
		Addition of the monitored tape unit	Addition of tape units monitored by the tape cleaning monitoring.	
		Addition of the reported message	Addition of kernel driver message that reports when an error occurs.	
	Remote Support	Enhancement of the remote maintenance	Enhancements to remote maintenance system setting menu and function that reports to Fujitsu Support Center.	
	CPU Patrol CPU patrol diagnosis support Support PR GP		Support for CPU patrol diagnosis function on PRIMEPOWER200/400/600/800/1000/2000 and GP7000F Models 200/200R/400R/400A/600/600R/1000/2000.	
1. 7. 1	7.1 All components Solaris 8 OS support Support		Support for Solaris 8 0S on PRIMEPOWER800/1000/2000 and GP7000F Models 1000/2000.	
	DR Command	Dynamic Reconfiguration support	Support for Dynamic Reconfiguration on Solaris 8 OS with PRIMEPOWER800/1000/2000 and GP7000F Models 1000/2000.	
	*SCF Driver	Dynamic Reconfiguration support	Support for Dynamic Reconfiguration on PRIMEPOWER800/1000/2000 and GP7000F Models 1000/2000.	
	Machine Administration	Dual console path support	Addition of function to automatically shift dual console path on PRIMEPOWER800/1000/2000 and GP7000F Models 1000/2000.  This function is supported on Solaris 8 OS or later.	
	Output Tool support in Reliability I/O multi-pathing support St Driver model of the support St  Dynamic Reconfiguration St support St		Addition of Dynamic Reconfiguration information to the collected data.	
			Support for serial port driver I/O multi-pathing on PRIMEPOWER800/1000/2000 and GP7000F Models 1000/2000. (Solaris 8 OS only)	
			Support for Dynamic Reconfiguration on Solaris 8 OS with PRIMEPOWER800/1000/2000 and GP7000F Models 1000/2000.	
1.7	All components PRIMEPOWER1 support Solaris 8 OS support		Support for PRIMEPOWER1.  Support for Solaris 8 OS on PRIMEPOWER200/400/600.	
	*SCF Driver	Support of the scfconf command	*SCF preferences (power switch, system clock, and UPS operation) can be set using command interfaces on PRIMEPOWER200/400/600.	
	SunVTS, FJVTS	Enhancement of FJVTS PRIMEPOWER2000 support	fjcachetest and fjcputest added to FJVTS. FJVTS able to diagnose PRIMEPOWER2000 with CPU configurations between 65 and 128 CPUs.	

Version Level	Component	New Feature Name	Description
1.7	Administration notification message n		Addition of component description to notification messages when errors in CPU, memory, or disk occur on PRIMEPOWER800/1000/2000 and GP7000F Models 1000/2000.
		New tape unit support	Support for tape unit(DDS4) cleaning notification.
	System Data Output Tool CPU Performance	Driver definition information CPU performance counter	Addition of driver definition information to data collected.  Support for CPU performance counter feature
	Counter	support	with Fujitsu SPARC64 GP processors. Feature includes kernel driver, libraries, and utilities. For more detailed information, see manual page FJSVcpc(3CPC).
	Online Trace	Deletion of Online Trace	The Online Trace function is included in each of the following products.  • Each NetCompo product  • SynfinityCLUSTER/PCL  • SynfinityLINK/GLSThe Online Trace function was deleted from the Enhanced Support Facility.
1.6	Enhanced Support Facility Information Management	Improvement of the esfadd command	Automatic determination of system platform.  (No longer have to specify the source directory with the -d option)
	SunVTS, FJVTS	Version upgrade	SunVTS and FJVTS for Solaris 7 0S /Solaris 8 0S upgraded from version 3.4 to 4.0.
		New adapter support	GigabitEthernet Card(PP028GE1U) can be diagnosed using the nettest.
1.5	All components	PRIMEPOWER support	Support for PRIMEPOWER200/400/600/800/1000/2000.
	*SCF Driver	Operator call support	Support for function that controls the operator call signal on the user terminal board interface.
		Shutdown support via RCI network	Support for function that shuts down a system using a shutdown request via RCI network.
	SunVTS, FJVTS	Version upgrade	SunVTS and FJVTS for Solaris 7 OS/Solaris 8 OS was upgraded from version 3.2 to 3.4.
	Machine Administration	PRIMEPOWER support	Support for hardware monitoring and maintenance of PRIMEPOWER200/400/600/800/1000/2000.
		Addition of the reported message  Enhancement of the remote maintenance	Addition of a kernel driver message that reports when an error occurs.  Enhanced remote maintenance system setting menu and function that reports to Fujitsu
	Server Default Configuration	CPU offline function	Support Center.  Addition of function that offlines a CPU with frequently occuring ECC errors.

Version Level	Component	New Feature Name	Description
1.5	System Data	SynfinityFile/Global	Addition of SynfinityFile/Global system
	Output Tool	support	information to collected data.
	Crash Dump Assistant	Solaris 2.6 OS support	Support for Solaris 2.6 OS.
	Reliability	Serial port driver	Up to thirty two serial ports supported for
	Driver	•	PRIMEPOWER800/1000/2000.
1.4	All components	Solaris 8 OS support	Support for Solaris 8 OS.
	*SCF Driver GP7000F Models 1000/2000 SC		SCF2 driver added as a RAS control device
		support	driver for GP7000F Models 1000/2000.
			SunVTS and FJVTS for Solaris 7 OS/Solaris 8 OS upgraded from version 3.0 to 3.2.
		New ATM, FDDI adapter	Adapters GP7B8AT1 (ATM), GP7B8FD1 (FDDI-SAS),
		support	and GP7B8FD2 (FDDI-DAS) can be diagnosed using nettest.
		Enhancement of the serial	Enhanced serial port test(sptest) for GP7000F Models 1000/2000.
		port test  Integration of the test	
		manual	FJVTS Test Reference Manual was integrated between Solaris 2.6 OS, Solaris 7 OS and
		manuai	Solaris 8 0S.
	Machine	GP7000F Models 1000/2000	Support for the hardware monitoring and
	Administration	support	maintenance of GP7000F Models 1000/2000.
		Addition of the reported	Addition of a kernel driver message that
		message	reports when an error occurs.
		Remote maintenance support	Addition of remote maintenance system setting
			menu and function that reports to Fujitsu Support Center.
	Server Default	Partition Dump Function	Support for the Partition Dump Function for
	Configuration		GP7000F Models 1000/2000.Can be used from a
			System Management Console or Panel switch. See
			manuals for more detailed information.
		Memory error inspection	Provision of a memory error inspection
		function	function.
	System Data System Management Console		Addition of information related to the System
	Output Tool	support	Management Console.
		Forbidden file support	Addition of a function to exclude parts of
	Reliability Serial port driver		system data from data collected by the System Data Output Tool.
-			Up to thirty two serial ports supported for
			GP7000F Models 1000/2000.
1.3	All components	Change of product name	In version 1.3, Basic Software Extension was
		CD7000F W 1 1 C00P	renamed Enhanced Support Facility.
-	Web-Based Admin	GP7000F Model 600R support Definition of access	Support for GP7000F Model 600R.  An access interface name can be defined
	View / WWW	interface name for each node	separately in each node.
	Server for	Improvement of the	Performance improvement when collecting
	Admin View	performance when collecting	traces where the name service cannot be
		traces	solved.
		Binding function for a	An access interface for use can be specified.
		specific access interface	·

Version Level	Component	New Feature Name	Description	
1.3	System Data Output Tool	Japanese messages support	Support for Japanese messages for Machine Administration.	
		instruction set	Addition of instruction set architectures	
		architectures	with the isainfo command.	
		Core file information	Addition of the specification of core file information using the coreadm command.	
	License Manager	Changes the port number of a license server	Ability to change the default port number of a license server to "27000" with the setup_license command.	
	Crash Dump Assistant (Solaris 7 OS only)	Crash Dump Assistant	Following crash dump file creation when system reboots after a crash, Crash Dump Assistant invokes "System Data Output Tool" to save the necessary system data for troubleshooting.	
1.2	All components	Solaris 7 OS support	Support for Solaris 7 OS.	
	Basic Software Extension Information	Support of the -c option	The -c option was added to the bseadd command.  Displays the update packages with the -c option.	
			Support for the update of Basic Software Extension with the bseadd command.	
	*SCF Driver	Displays unit name required for replacement	Support for function to allow the prtdiag command to display the failed unit name.	
		Displays the detailed	The following detailed information can be	
h a R t a a control to the support of the support o		information of the units	displayed by the prtdiag command if the hardware model has sufficient capabilities. ampere, voltage, temperature of power units RPM of fans temperature of mother boards	
		64-bit environment support	ambient temperature  The *SCF driver can run in a 64-bit environment	
		Support of the new hardware model	with the 64-bit driver.  Supports GP7000F Models 200R, 400R, and 400A.	
	Online Trace	64-bit system support	Provides the Online Trace function on 64-bit Solaris 7 OS systems.	
	SunVTS, FJVTS	SynfinityDisk support	Hard disk drives under SynfinityDisk can be diagnosed with fjvfytest.	
		Basic communication adapter (GP7B8BA1) support	The basic communication adapter(GP7B8BA1) can be diagnosed with fjbcdrtest.	
	Auto Power Control System	Auto Power Control System GUI	A function that displays or sets the Auto Power Control System Schedule by GUI is supported.	

Machine   Administration   Support of FRU property   display   Addition of function that display   Properties of degraded comport   hardware configuration display   degradation monitoring inform	nents in the ay and the nation display. ## Chapter 2 Modification

Bugs found in the software of previous version levels that have been fixed. See the following table 2.1, for details of the bugs and their P-number.

Table 2.1

Version Level	Component	Correction number	Content of correction or Corrected Bug
3. 1	Auto Power	PG56951	The automatic power supply control function of ESF will
	Control System		be supported in SPARC Enterprise M4000/M5000/M8000/M9000.
	Crush Dump	PG52975	System information(fjsnap command) may not be collected
	Assistant		during reboot after the occurrence of a system panic.
3. 0. 1	-	_	No modification has been done.
3. 0	SCF Driver	PG46620,	The Fault LED of a disk unit may not be controlled correctly
		PG46621	in a Solaris 10 environment.
	Machine	PG43995	When the system is rebooted the first time after the ESF
	Administration		is installed, an improper message might be output to the
			console.
		PG44057	The tape cleaning monitoring function does not work on
			GP7000S, FUJITSU S series.
		PG44536	The error message might be displayed at system initiation
			and prephp (1M), postphp (1M) or updateunitinfo (1M)
			command execution.
		PG46504	The hot swapping of disk drive might fail on the Solaris
			10 system.
		PG48778	The error mark is reset when power is turned on to
			incorporate a disk unit that has been substituted by cold
			swapping.
		PG48779	evmond may output an unnecessary message during the
			first-time startup after the installation of the package.
		PG48780	The life monitoring function of tape units was improved.
		PG48781	For PRIMEPOWER250/450, GP7000S, and S Series, an
			improvement was added so that messages that had been
			suppressed in the past are not reported when notification
			suppression for the messages is canceled.
		PG48782	For PRIMEPOWER250/450, error descriptions in the help
			information of the madmin menu were corrected.
		PG48783	For PRIMEPOWER250/450, the Mask value of the configuration
			information may not be displayed correctly.
		PG48784	For PRIMEPOWER250/450, the hrdconf processing during
			startup in a large-scale configuration was improved.

Version		Correction	
Level	Component	number	Content of correction or Corrected Bug
		PG49356	The load of CPU increases because the hcd demon which
			manages hardware configuration information loops
			infinitely.
		PG49949	Performance improvement of the setdiskinfo command and
			phpcmd command
	System Data	PG38592	Improve functions to decrease the load of the memory during
	Output Tool		execution.
		PG46966	The hardware log of the ESF/SCS machine administration became target of information collection of the fjsnap
			command regardless of the data size of the log.
	Reliability Driver	PG27531	The software interruption function may become inoperative and applications that output console messages may be
0.0	COP 1:	DC 40005	stopped.
2.6	SCF driver	PG40825	When Dual power feed is configured and even if power is recovered, OS Shutdown might be done.
	Machine Administration	PG40558	When Dual power feed is configured and even if power is recovered, OS Shutdown might be done.
		PG40361	A part of the Machine Administration function might not work correctly when environment variable LC_MESSAGES or LC_ALL is set to ja.
		PG40732	The function to control the error report is improved.
		PG41268	The function of hardware error, life or preventive monitoring might stop.
		PG41319	"Management of Hardware Error Event" menu might mistake the detection of an error factor.
		PG41349	Cache Way information on SPARC64-V CPU of 2.08GHz is not displayed by the hrdconf command display on PRIMEPOWER2500
		PG41351	Addition of function so that the display level of "ACFAIL occered (ACS=X)" message can be changed from Information to Warning is added.
		PG42338	The name of error component may not be displayed correctly in the message of preventive replacement for disks.
		PG42740	Unnecessary messages are displayed while uninstalling ESF2.5.1 on the Solaris8 or 9.
		PG42901	Monitoring and maintenance operation for Power Supply Unit and Fan Unit on Expansion File Unit may not work correctly.
		PG43120	Some errors which occurred on the server may not report to SMC.
		PG43480	The hardware configuration display function displays the information of another PCI adapter at the line of onboard device.
		PG43524	The host selection window in the GUI menu might not close when the "End" button is pressed.
		PG43611	The wrong error component name may be displayed when system bus error occurs on PRIMEPOWER1/100.
		PG43736	Some errors which the sd driver detects may not be reported on PRIMEPOWER250/450.
		PG43902	The expansion file unit is not configured, when it is added by PCI Hot Plug.
		PG43983	The LED of the machine may not blink when an error is occurred in the machine.

Package name	Patch ID	P-number	Bug
FJSVamadm	914527-06	PG65015	The Machine Administration supports SPARC Enterprise M3000.
		PG65033	In SPARC Enterprise M4000/M5000/M8000/M9000, the Machine
			Administration supports the fjgi PCIe Low Profile Quad Gigabit
			Ethernet Card(SE0X7GQ2F/SE0X7GQ2X).
		PG65226	In SPARC Enterprise M3000/M4000/M5000/M8000/M9000, the
			hardware configuration information of the Sun StorEdge SAN
			Foundation Software of the tape device is supported.
		PG62167	In SPARC Enterprise M4000/M5000/M8000/M9000, the disk drive
			might not be able to be replaced on the hot swap.
		PG63314	In SPARC Enterprise series, the Machine Administration
			supports the Expansion File Unit(SEOX9FL1F, SEOX9FL1N,
			SEOX9FL1X, SEOX9FL1A).
		PG63339	In SPARC Enterprise M4000/M5000/M8000/M9000, the disk drive
			where the hot swapping was executed might not be displayed in
			the hardware configuration information.
		PG63804	In SPARC Enterprise M4000/M5000/M8000/M9000, configuration
			information of the ZFS disk drive might not be correctly made.
		PG56941	In SPARC Enterprise M4000/M5000/M8000/M9000, Auto Power
			Control System was supported.
		PG57316	In SPARC Enterprise M4000/M5000/M8000/M9000, the performance
			of the function to make hardware configuration on the Machine
			Administration is improved.
		PG56942	In SPARC Enterprise M4000/M5000/M8000/M9000, The Domain
			Initiated Dynamic Reconfiguration connection script of the
			Machine Administration is added.
		PG56967	The error of the FUJITSU ULTRA LVD SCSI Host Bus Adapter Driver
			might not be detected.
		PG57181	In SPARC Enterprise M4000/M5000/M8000/M9000, when OS is
			shutted down, an unnecessary message might be output.
		PG55662	In SPARC Enterprise M4000/M5000/M8000/M9000, configuration
			information on the External I/O Expansion Unit cannot be
			correctly displayed.
		PG55819	In SPARC Enterprise M4000/M5000/M8000/M9000, when the system
			hardware configuration is large, configuration information
			might not be displayed by the "Hardware Configuration" menu on
			the Machine Administration.
		PG54013	In SPARC Enterprise M4000/M5000/M8000/M9000, configuration
			information might not be correctly created.
FJSVmadm	914601-02	PG57450	In PRIMEPOWER250/450, the Machine Administration might not
			report error when the system panics.
		PG56967	The error of the FUJITSU ULTRA LVD SCSI Host Bus Adapter Driver
DIOV 1	014604 00	D004500	might not be detected.
FJSVamle	914604-03	PG64726	In SPARC Enterprise T5140/T5240, The Machine Administration
FJSVmadm		D000014	supports on the guest domain of the Logical Domains (LDoms).
		PG63314	In SPARC Enterprise series, the Machine Administration
			supports the Expansion File Unit(SEOX9FL1F, SEOX9FL1N,
		DC62215	SE0X9FL1X, SE0X9FL1A).
		PG63315	In SPARC Enterprise T1000/T2000/T5120/T5220/T5140/T5240, the
			Machine Administration supports "Hot Swapping Guide" menu.

		PG63018	In SPARC Enterprise T5120/T5220/T5140/T5240, The abnormality
			of the FAN might not be informed of to the REMCS center.
		PG62163	The Machine Administration supports SPARC Enterprise T5140/T5240.
		PG62164	In SPARC Enterprise T5120/T5220, The Machine Administration supports the 10GbE XAUI Card(SESX7XA1F).
		PG60800	In SPARC Enterprise T5120/T5220, The Machine Administration supports on the guest domain of the Logical Domains (LDoms).
		PG57023	The Machine Administration supports SPARC Enterprise T5120/T5220.
		PG58840	In SPARC Enterprise T1000/T2000/T5120/T5220, the help of the
		1 000040	Machine Administration menu is wrong.
		PG57020	In SPARC Enterprise T1000/T2000, the Machine Administration
		1 001020	supports the error monitoring function of the CPU/memory when
			the OS is booted.
		PG57022	In SPARC Enterprise T1000/T2000, the machine administration
		1 33132	supports the Hardware Configuration of the memory.
		PG55176	Abnormality might not be informed of to the REMCS center.
		PG54246	The hardware configuration information of the Sun StorEdge SAN
			Foundation Software is supported.
FJSVamle	914718-01	PG65114	In SPARC Enterprise T1000/T2000/T5120/T5220, the Machine
3			Administration improves the monitoring function of FAN/PSU.
FJSVpmnd	914529-04	PG61804	In PRIMEPOWER250/450, the Hardware Error Log menu of the
			Machine Administration might not be displayed.
		PG57450	In PRIMEPOWER250/450, the Machine Administration might not
			report error when the system panics.
		PG40732	The function to control the error report is improved.
		PG53968	CHECK LED blinks when reading/writing mode of the SNMP
			community is set by the scfsnmp command.
		PG53969	CHECK LED might happen to blink when an abnormal device is
			detected.
FJSVcmnd	914490-01	PG55214	The report function of the RCI error is supported on PRIMEPOWER650/850.
FJSVamrm	914588-01	PG56030	Add SIRMS functions for SPARC Enterprise
			M4000/M5000/M8000/M9000
FJSV1mrm	914603-03	PG62160	The periodical connection event is sent to the REMCS center at
			the unexpected time.
		PG62159	The invalid date is stored in the REMCS setup file when the
			periodical connection schedule is changed by using REMCS agent
			menu.
		PG62151	The maximum number of CPU configurations in the hardware
			configuration file of REMCS is expanded to 256 CPUs.
		PG60814	In SPARC Enterprise T5120/T5220, REMCS supports on the guest
			domain of the Logical Domains(LDoms).
		PG57432	For SPARC Enterprise T1000/T2000, the maximum number of CPU
			configurations in the hardware configuration file(MIF) is
			expanded to 64 CPUs.

Package name	Patch ID	P-number	Bug
FJSVsirms	914585-01	PG55880	Cannot send Software Investigation Information from SPARC Enterprise M4000/M5000/M8000/M9000.
		PG56806	When Investigation Information with size exceeding 400MB cannot be sent, incorrect error message is displayed.
		PG56815	When a server name is same as its host name, software configuration information is not made correctly.
		PG56818	In SPARC Enterprise M4000/M5000/M8000/M9000, when sending confliction to the REMCS center occurs, incorrect error message is displayed.
FJSVparam	914192-02	PG61343	Improvement of check for recommendation setting of Solaris Tunable Parameters (autoup, memscrub_period_sec).
		PG61344	If the LC_ALL or LC_MESSAGES environment variable is set, the warning message of "Insufficient savecore device(0 MB)" might be displayed.
		PG43297	The warning message about the parameter related to fsflush might be displayed because of the modification of the recommendation value of "Hardware Platform Guide".
		PG43286	Even if the savecore area is appropriately set depending on "dumpadm" command, the warning message of "Insufficient savecore device(0 MB)" might be displayed.
FJSVdcnf	914644-02	PG64529	Information on the suspected parts may not be output in FJSVmadm's messages when the tape device added by fjcnfset(1M) command is out of order.
		PG64530	The fjcnfset(1M) command may output the error message("Invalid fjpfca.conf.") even if the /kernel/drv/fjpfca.conf file is correct.
		PG64532	The function to set the definition of the Ultrium3 half height drive to the /kernel/drv/st.conf automatically is supported.
		PG59345	The function to set the definition of the Ultrium4 drive to the /kernel/drv/st.conf automatically is supported.
		PG59433	The function to recognize ETERNUS LT230 and LT250 tape libraries in the fibre channel switch(Fabric) connection automatically and add the necessary settings for the libraries to the /kernel/drv/st.conf automatically is supported.
		PG60479	The fjcnfchk(1M) command does not output the error message(duplicate configuration) which ought to appear when the duplicate definitions of the tape-config-list line are given in the /kernel/drv/st.conf.
		PG60509	Unifying notation between values in "current value" outputted by fjcnfchk(1M) command and the /kernel/drv/st.conf file is performed. In the same way, uniformity of notation between values in "recommend value" and User's Guide is preserved.

Manuals & Patches 3.1A10 Patch CD-ROM is bundled as an accompaniment of Enhanced Support Facility 3.1.

Regarding patches included in Manuals & Patches 3.1A10, please refer to the following Table 2.3.

Table 2.3

Package name	Patch ID	P-number	Bug
FJSVamadm	914527-11	PG71265	In PRIMEPOWER250/450, the Machine Administration improves the
			error monitoring function of the disk unit.
		PG73681	The error of the FUJITSU ULTRA LVD SCSI Host Bus Adapter Driver might not be detected.
		PG72741	In SPARC Enterprise M3000, Machine Administration support
		1012141	added for the Expansion File Unit(SEOX9FL1F, SEOX9FL1N, SEOX9FL1X, SEOX9FL1A) connected to the standard(on board) SAS
			port.
		PG72291	In SPARC Enterprise M3000/M4000/M5000/M8000/M9000, the Machine Administration supports the error monitoring function of the 8Gbps fibre channel card(SE0X7F21F/SE0X7F22F).
		PG72292	In SPARC Enterprise M3000, the Machine Administration improves the hardware configuration display function of the Expansion File Unit(SEOX9FL1F, SEOX9FL1N, SEOX9FL1X, SEOX9FL1A).
		PG72467	The size of the evh_log file about the Machine Administration might expand.
		PG68682	In SPARC Enterprise M4000/M5000/M8000/M9000, the Machine
			Administration might not be able to display the hardware
			configuration information of the External I/O Expansion
			Unit (SENY8BE1F).
		PG68683	In SPARC Enterprise M3000/M4000/M5000/M8000/M9000, the
			Machine Administration might notify the XSCF of the wrong error code.
		PG68684	In SPARC Enterprise M3000/M4000/M5000/M8000/M9000, the
			Machine Administration might not be able to detect the error of some PCI card.
		PG66802	In SPARC Enterprise M3000/M4000/M5000/M8000/M9000, the Machine Administration cannot correctly display the name of the
			Expansion File Unit and the disk unit.
		PG66803	In SPARC Enterprise M3000/M4000/M5000/M8000/M9000, the
			Machine Administration cannot correctly do a preventive monitoring of the disk.
FJSVmadm	915009-02	PG68178	In PRIMEPOWER650/850/900/1500/2500/HPC2500, the Machine Administration supports the command by which all error marks are cleared.
		PG65655	In GP7000F models 200/200R/400/400A/400R/600/600R/1000/2000, PRIMEPOWER1/100/200/400/600/800/1000/2000/250/450,
			FUJITSU S series, GP 7000S series, the Machine Administration
			supports the command by which all error marks are cleared.
	914601-04	PG73681	The error of the FUJITSU ULTRA LVD SCSI Host Bus Adapter Driver
			might not be detected.
		PG72467	The size of the evh_log file about the Machine Administration
		1	might expand.

Package name	Patch ID	P-number	Bug
FJSVamle	914604-06	D071065	In PRIMEPOWER250/450, the Machine Administration improves the
FJSVmadm		PG71265	error monitoring function of the disk unit.
		PG72291	In SPARC Enterprise series, the Machine Administration
			supports the error monitoring function of the 8Gbps fibre
			channel card (SEOX7F21F/SEOX7F22F).
		PG68513	In SPARC Enterprise series T5120/T5220/T5140/T5240/T5440, the
			Machine Administration supports the External I/O Expansion Unit(SENY8BE1F).
		PG68514	In SPARC Enterprise series T5120/T5220/T5140/T5240/T5440, the
			Machine Administration cannot detect the error of the internal DVD drive.
		PG68515	In SPARC Enterprise T1000/T2000/T5120/T5220/T5140/T5240/
			T5440, the Machine Administration cannot correctly do a
			preventive monitoring of the disk.
		PG68516	In SPARC Enterprise T5140/T5240/T5440, the Machine
			Administration might not operate correctly.
		PG66146	In SPARC Enterprise T5140/T5240/T5440, the Machine
			Administration might not be able to monitor the FAN, the PSU,
			and the memory.
		PG65537	In SPARC Enterprise T1000/T2000, the Machine Administration
			improves the error monitoring function of FAN/PSU when the OS
			is booted.
		PG65114	In SPARC Enterprise T1000/T2000/T5120/T5220, the Machine
			Administration improves the monitoring function of FAN/PSU.
FJSVpmnd	914529-05	PG73561	In PRIMEPOWER250/450, the load of the system increases because
			the setunitinfo command of the Machine Administration run
		DOELOGE	continuously.
		PG71265	In PRIMEPOWER250/450, the Machine Administration improves the
DION 1	014400 00	D051005	error monitoring function of the disk unit.
FJSVcmnd	914490-02	PG71265	In PRIMEPOWER250/450, the Machine Administration improves the
ETCV 1	015077 01	DC710CE	error monitoring function of the disk unit.
FJSVsmnd	915077-01	PG71265	In PRIMEPOWER250/450, the Machine Administration improves the
FJSV1mrm	914603-06	PG70138	error monitoring function of the disk unit.  In the REMCS agent of SPARC Enterprise
LJSVIIIIIII	914003-00	FG70136	T1000/T2000/T5120/T5220/T5140/T5240/T5440, the periodical
			connection may be sent twice successively.
		PG70139	In the REMCS agent of SPARC Enterprise
		1010133	T1000/T2000/T5120/T5220/T5140/T5240/T5440, the file update
			date and time stored in the REMCS setting file may not be
			correct.
		PG70140	In the REMCS agent of SPARC Enterprise
			T1000/T2000/T5120/T5220/T5140/T5240/T5440, the maintenance
			start menu and maintenance end menu are supported with the root
			privilege.
		PG70141	In the REMCS environment setting menu of the SPARC Enterprise
			T1000/T2000/T5120/T5220/T5140/T5240/T5440 REMCS agent, the
			function to automatically set the default periodical
			connection schedule is supported.

Паше		PG70142	In the REMCS agent of SPARC Enterprise
		1070142	T1000/T2000/T5120/T5220/T5140/T5240/T5440, among the
			information set in the registration menu, the function is added
			so that the "Department/Division" will be optional instead of
			requirement.
		PG70143	In the REMCS agent of SPARC Enterprise
		1070143	T1000/T2000/T5120/T5220/T5140/T5240/T5440, the prolonged
			Japanese sound displayed in the menu will be always described
			in one way.
		PG70144	In the REMCS agent of SPARC Enterprise
		1010111	T1000/T2000/T5120/T5220/T5140/T5240/T5440, the function is
			added so that the maintenance end menu will be executable even
			if the REMCS agent status is "System on ordinary operation".
		PG70957	In the REMCS agent of SPARC Enterprise
		1010301	T1000/T2000/T5120/T5220/T5140/T5240/T5440, the firmware
			version will be stored in the hardware configuration
			information.
		PG70958	In the REMCS agent of SPARC Enterprise
		1010300	T1000/T2000/T5120/T5220/T5140/T5240/T5440, the POP server
			name is not displayed in the environment setting menu when
			selecting "POP before SMTP".
		PG68638	In SPARC Enterprise T5120/T5220/T5140/T5240/T5440, when each
		1 000000	domain is operated with Logical Domains (LDoms) in the different
			time zone, the REMCS center might mistake the time of periodical
			connection time-out.
		PG65673	In SPARC Enterprise T1000/T2000/T5120/T5220/T5140/T5240, even
		1 005015	if REMCS failed to send error message of remote report, REMCS
			try to send error logs.
		PG65672	In SPARC Enterprise T1000/T2000/T5120/T5220/T5140/T5240,
		1 005012	REMCS supports power-on and power-off events.
		PG65671	In SPARC Enterprise T1000/T2000/T5120/T5220/T5140/T5240,
		1 003071	REMCS supports Point-to-Point (Mail Only) connection.
FJSVrlib	914701-02	PG70071	Changes rmschto2.1st file for modification of the REMCS Center
1 3341110	314701 02	1070071	names.
		PG65511	Point-to-Point Connection (Mail Only) is supported in the REMCS
		1 003311	function.
FJSVsirms	914585-02	PG72132	Process might stop for input waiting, when
1 13 13 11 113	314000 02	1012102	soft-registration-info is made.
		PG73237	Access authority of the message file is improper.
FJSVparam	914192-03	PG67705	In some cases, files to be fixed may not be replaced, though
1 JSV par alli	914192 03	1007703	the patchadd command finishes normally.
FJSVdcnf	914644-03	PG68846	The function to set the definition of the Ultrium4 half height
FJSVdeni	314044 03	1 000040	drive(SAS) to the /kernel/drv/st.conf automatically is
			supported.
		PG68848	The function to set the definition of the Ultrium4 full height
		1 000040	drive(SAS) to the /kernel/drv/st.conf automatically is
			supported.
		PG68872	In some cases, the patch is not installed completely and
		1000012	cannot be removed once it is installed, though the patchadd
			command finishes normally.
